PG&E AND DIABLO CANYON DECOMMISSIONING ENGAGEMENT PANEL TO DELAY AND EXTEND MEMBERSHIP APPLICATION PERIOD DUE TO COVID-19 SITUATION

SAN LUIS OBISPO, Calif. (April 2, 2020)—Pacific Gas and Electric Company (PG&E) and the Diablo Canyon Decommissioning Engagement Panel (the Panel) announced jointly today that the application window for membership on the Panel has been delayed due to the current COVID-19 situation.

The 2020 application window originally launched March 12. Since then, the COVID-19 pandemic and associated shelter-at-home orders have disrupted or altered most school, work and civic activities.

Given the nature of this crisis, PG&E and the Panel will delay their solicitation for applicants to a future date. A 30-day application window will be reopened and advertised at a later time, once the pandemic has subsided. Applications that have already been received since March 12, 2020 will be included in the future selection process.

All current Panel members will remain on the Panel until the 2020 membership process can be completed.

For more information about the panel, visit diablocanyonpanel.org or pge.com/engagementpanel.

About the Panel:

The Diablo Canyon Decommissioning Engagement Panel was created to foster open and frequent dialogue between members of the local community and PG&E on matters related to DCPD decommissioning. Panelists are local community members from across San Luis Obispo County who were selected to broadly represent diverse community viewpoints. The Panel meets periodically on matters related to DCPD decommissioning and the future use of DCPD lands and facilities.

About Diablo Canyon Power Plant

Diablo Canyon Power Plant is a nuclear power facility owned and operated by PG&E. Its two units together produce approximately 2,300 net megawatts of carbon-free power.

About PG&E

Pacific Gas and Electric Company, a subsidiary of PG&E Corporation (NYSE:PCG), is one of the largest combined natural gas and electric energy companies in the United States. Based in San Francisco, with more than 20,000 employees, the company delivers some of the nation's cleanest energy to 16 million people in Northern and Central California.
